<Work Experience />

Global Logic, Noida
Associate Consultant, 2018-PRESENT

Project: Online Learning/Assessment application.
Our client is a well known organization in field of education and books publishing. For our client, we are building a product for online education where learners (students) and instructors (teachers) can interact online.

- Worked on setting up enviroment for React & Redux based web app
- Involved in end to end design and architecture of front end.
- Created an inhouse library of reusable react UI components
- Involved in mentoring and leading a dev team of 2 members
- Contributed as developer in building the student portal for online assessments/test.
- Worked on instructor portal for student's performance management

Acidaes Solutions (P) Ltd, Noida
Sr. Software Engineer, 2015-2017

Product: CRMnext
CRMnext is a comprehensive, easy-to-use, Customer Relationship Management (CRM) solution that is fast to implement. Using CRMnext, companies can efficiently manage and improve all customer facing operations like sales, marketing & customer service.

- Started migration of CRMnext into React based frontend from scratch which was earlier written in C# MVC
- Created environment and architecture for frontend development using Javascript & React.js and REST api in existing C# MVC project.
- Actively involved in architecture and reusable component development using React.js
- Involved in helping/mentoring developer to understand ReactJS
